McData Sphereon ES-4700

- 16 Active, 4Gb/s Ports
- Includes 16x 4Gb SFP
- FC SAN Switch

This unit is unused in original packaging and carries a 30 day warranty.

OVERVIEW:

The 32-port McDATA 4700 Fabric Switch lets you scale from 16 to 32 ports in 8-port increments using McDATA's FlexPort pay-as-you-grow technology. This top-of-the-line, 4 Gb/s Fiber Channel fabric switch comes with an install wizard and full fabric services standard. Ideal for mid-size to large fabrics, the McDATA 4700 provides high availability features such as hot-swap redundant power and cooling, and dense port count. The switch is designed with exceptional port density: 32 ports in 1U of rack space. The McDATA 4700 also provides the highest performance available, with 4 Gb/s non-blocking bandwidth on every port and the ability to auto-negotiate to 2 and 1 Gb/s to protect existing investments.

Ports Qty:

16

Data Transfer Rate:

4.25 Gbps

Data Link Protocol:

4Gb Fibre Channel (Short Wave)

Fibre Channel:

FC-AL-2, FC-DA, FC-FS, FC-GS-4, FC-MI, FC-PH-3, FC-PI, FC-SB-2, FC-SB-3, FC-SW-3, FC-SWAPI

Remote Management Protocol:

SNMP

Connectivity Technology:

Wired

Communication Mode:

Full-duplex

Status Indicators:

Port status, power, error

Features:

Hot swap module replacement, auto-negotiation, manageable, FlexPort Technology, firmware upgradable
